

Muhammad Wahab Khan

Islamabad, Pakistan 45600

+92 306 5351011 | mwahab.1611@gmail.com | [Github](#) | [Linkedin](#) | [Website](#)

Education

BS Computer Science

Sep 2018 – Sep 2022

International Islamic University

Islamabad, Pakistan

Teaching Experience

• Section Leader (Instructor) | [\[Link\]](#)

Apr 2026 – May 2026

Stanford CiP

Remote, CA, USA

- Selected as a Section Leader (Volunteer) for Stanford University: Code in Place 2026.
- Led weekly sessions and taught CS106A - Introduction to Python to a globally diverse cohort of students.

• Junior Lecturer

Jul 2024 – May 2025

Iqra University

Islamabad, Pakistan

- Courses (labs) taught:

CMC111 - Programming Fundamentals (Spring 2025, Fall 2024)

CMC251 - Data Structure & Algorithms (Spring 2025, Summer 2024)

CMC331 - Database Management System (Spring 2025, Fall 2024)

GER111 - Application of Information & Communication Technology (Spring 2025)

CMC123 - Digital and Logic Design (Spring 2025)

CMC112 - Object Oriented Programming (Fall 2024)

CSC333 - Introduction to Python (Summer 2024)

Work Experience

• Software Engineer

Jul 2024 – Present

FIVERR

May 2021 – Jan 2024

- Delivered full-stack web development, database design, and software solutions to global clients across 300+ projects.
- Designed and deployed scalable, high-performance applications using modern frameworks and APIs.
- Collaborated with clients to translate requirements into functional systems, ensuring quality, usability, and on-time delivery

• Web Developer

Mar 2024 – Jun 2024

Dynamics 360

Islamabad, Pakistan

- Upgraded and optimized the company's content management system, improving performance and usability.
- Enhanced website functionality and resolved navigation and URL structure issues.
- Developed a custom portfolio website to showcase company projects and services.

• Web Developer

Mar 2023 – Sep 2023

Centangle Interactive

Islamabad, Pakistan

- Developed a data management system for GIZ, replacing manual Excel-based workflows with an automated web solution.
- Built employee and department management systems using PHP and MySQL.
- Designed an interactive sales dashboard for tracking products, sales, and client feedback.

• Trainee (MERN)

Dec 2022 – Feb 2023

QC360

Rawalpindi, Pakistan

- Gained hands-on experience in full-stack development using MongoDB, Express.js, React, and Node.js.
- Developed an e-commerce application with integrated frontend and backend functionality.
- Implemented CRUD-based systems to improve data organization and accessibility.

Projects

• AI Vulnerability Assessment | [\[GitHub\]](#)

- Set up a containerized environment (Docker, Ollama) to evaluate LLMs.
- Used Garak for prompt-injection/jailbreak testing.
- DependencyCheck for dependency vulnerabilities, and Giskard for systematic adversarial evaluation.
- Produced vulnerability reports for Microsoft Phi-3-Mini and open-source LLMs.
- **Dynamics360 Dashboard** | [[GitHub](#)]
 - Developed a dynamic admin dashboard to manage company data through an intuitive web interface.
 - Replaced manual database operations with automated CRUD functionalities, improving efficiency and data integrity.
 - Designed backend logic to enable seamless data management, including secure add, update, and delete operations.
- **Digi64** | [[Link](#)]
 - Developed a company website, highlighting services in custom software application development.
 - Implemented a responsive, user-focused design to ensure seamless functionality across desktops, tablets, and mobile devices.
 - Enhanced site structure, navigation, and UI/UX to improve accessibility and overall user engagement.
- **ERP** | [[GitHub](#)]
 - Developed a full-stack ERP web application, enabling management of products, raw materials, suppliers, workforce, and operational workflows.
 - Designed and implemented modular system architecture with role-based access control, ensuring secure and scalable data handling across different user roles.
 - Built dynamic dashboards and database-driven features to streamline inventory tracking, resource allocation, and business process automation.
- **TextILES** | [[GitHub](#)]
 - Developed a full-stack web application for digitizing organizational workflows.
 - Replaced manual Excel-based processes with an automated, user-friendly system to improve efficiency and data management.
 - Implemented a dynamic dashboard with data visualizations and graphs to support real-time insights.
 - Integrated role-based access control (RBAC) to enforce secure, permission-based access across different user roles.

Invited Talks

- **Guest Lecturer** @UET Lahore, GCW University & MEPS | Python Programming | [[Link1](#)][[Link2](#)] 19-20 May 2026

Honors and Achievements

- **LeetCode** | Solved 250+ Data Structure and Algorithms problems. [[Link](#)]
- **Chinese Govt. Scholarship** | Selected for Fully Funded CSC Scholarship at Wuhan University. [[Link](#)]
- **International Islamic University** | Merit Scholarship Recipient, Undergraduate, Jan 2019.
- **Quaid-i-Azam University** | Prime Minister Laptop Recipient, Undergraduate, Jul 2018.
- **Punjab College** | Merit Scholarship Recipient, High school, Aug 2015.

Skills

- **Programming Languages:** Python, Java, C++, PHP, JavaScript, SQL, Assembly (MARIE)
- **Web & Frameworks:** HTML, CSS, Bootstrap, React.js, Express.js, Django, Yii2
- **Databases:** MySQL, SQLite, MS Access
- **Tools & Technologies:** Git, GitHub, Docker
